

infrastructure cōrdination

**Maximising the value of
infrastructure from a place making
and sustainability perspective**

Molly Strauss and Phil Smith

MAYOR OF LONDON

Outcomes

Reduced
disruption
and
congestion

Improved air
quality

Savings for
collaborating
partners

Supporting
wider
economy

Improved
public realm

Accelerated
housing
delivery

infrastructure cōrdination

CENTRAL PRINCIPLES ACROSS PROJECTS

- **CONVENING** partners via the Mayor
- **ACHIEVING BENEFITS** for Londoners *and* stakeholders
- **DATA DRIVEN**, with information sourced directly from data owners
- **UNBLOCKING BARRIERS** otherwise seen as 'too difficult'
- **SENIOR BUY IN** driving results
- **EMBEDDING CHANGE** through processes and tools to change BAU

Healthy Streets through Streetworks

Healthy Streets Micro Improvements

- **PAINTED FEATURES:** removed centre line, 'mural' crossings, painted cycle markings.
- **DECLUTTERING AND REPURPOSING:** redundant/obstructive street furniture removal, decluttering signage
- **ACCESS AND SPACE:** lowered kerbs, raised parking bays, widened footway, narrowed side road junctions
- **GREY TO GREEN:** e.g. reinstatement of marginal areas with grass verges, wildflowers (vs. tarmac or paving)
- **DRAINAGE:** optimised integration with existing SuDS, e.g. changing camber of the road.
- **HEALTHY WORKSITES:** maintain walking/cycling routes, signage and posters re. accessibility, feedback boards
- **CONSISTENCY:** ensure reinstatement is as good as what was there previously

Sustainable Drainage and Streetworks

Enfield – On site currently

Gas mains replacement +
borough SuDS
reinstatement

Benefits to all involved –
including communities

infrastructure cōrdination

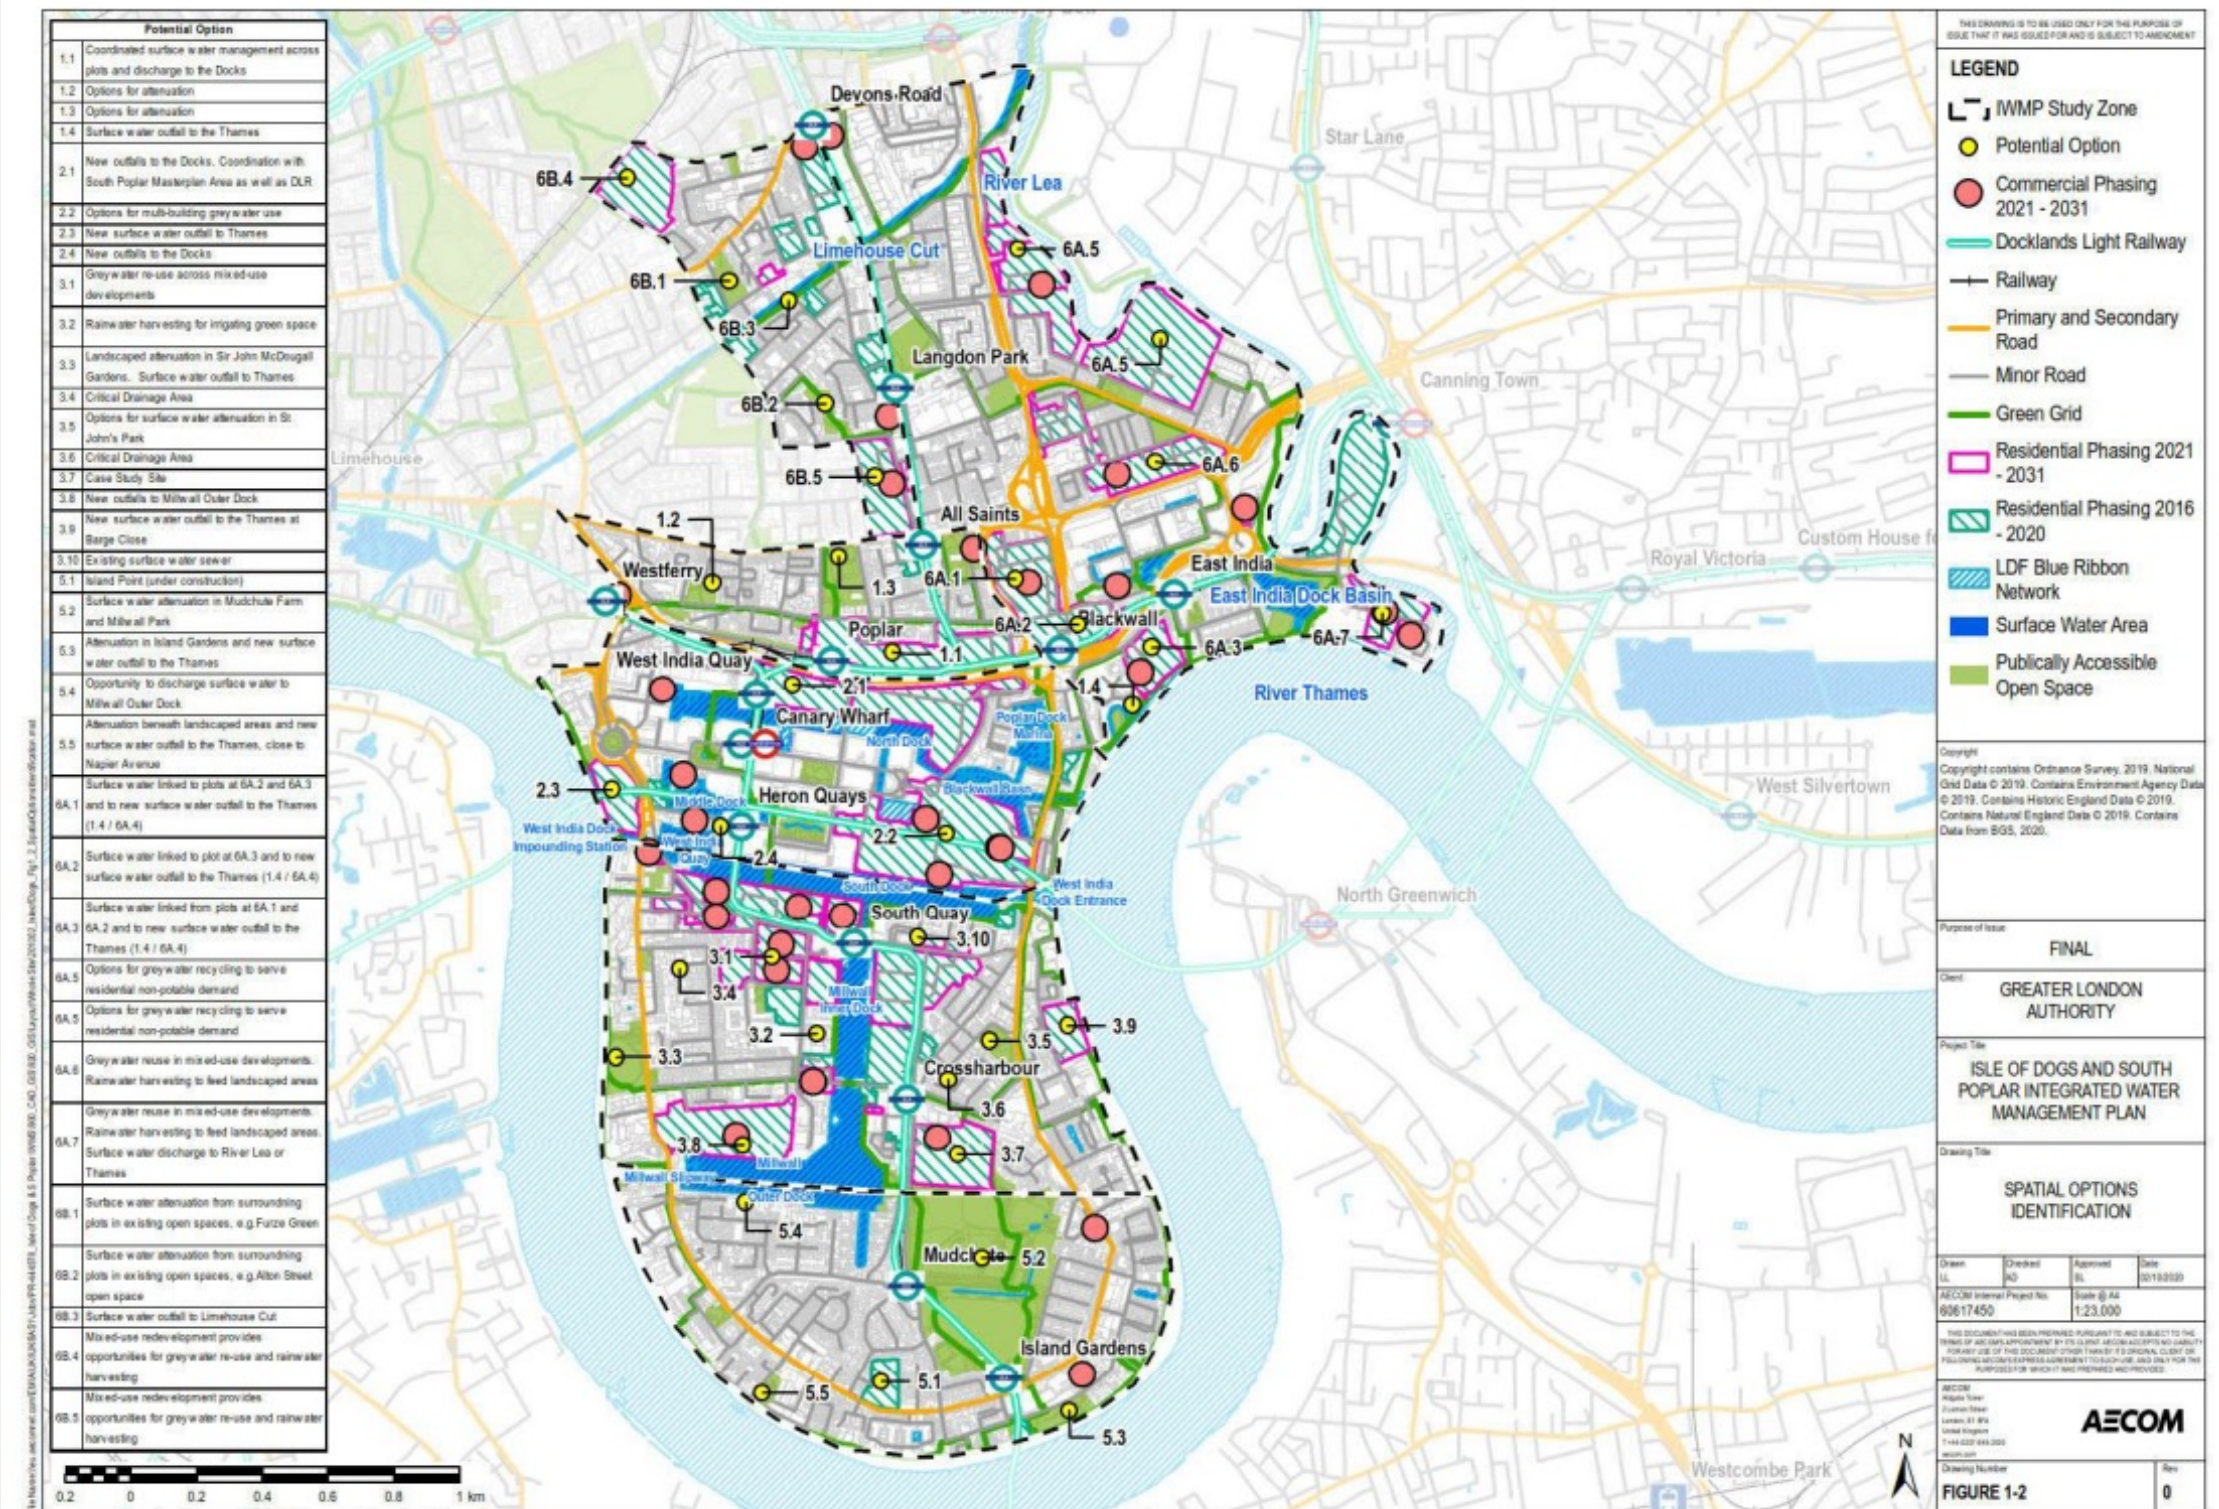

Integrated Water Management Strategies

Tower Hamlets - Isle of Dogs

Avoiding retrofit and development delay

Reducing demand, incorporating SuDS

MAYOR OF LONDON
