

How to care for your SOMSO-PLAST® Models

- Models made of SOMSO-PLAST® may be disinfected using CLA800/3 Veriforte® Surface Disinfection Solution
- Veriforte® is recommended by SOMSO® as it can be safely used on all SOMSO-PLAST® Models as it does not remove paint or numbering when used correctly

What is the product?

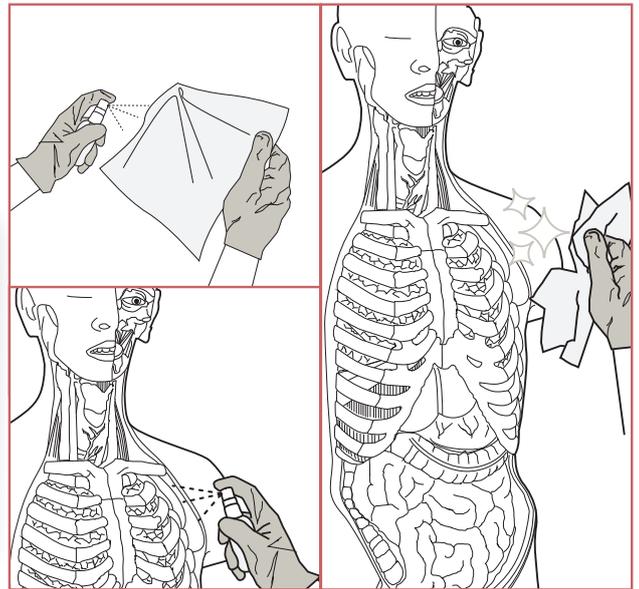

- The brand name is Veriforte® and it is manufactured in Austria
- Veriforte® is a mixture of sodium hypochlorite and hypochlorous acid in aqueous solution. It is generally used as a disinfectant for “wound irrigation”

How to Use

- Spray onto a cloth and gently wipe over the surface
- Spray directly onto the model and leave to dry
- Solution will also remove surface dirt
- Safety Data Sheet supplied

Cost

- £6 for 100ml bottle. Price excludes carriage and VAT

Diversity in the SOMSO® Range

- In response to enquiries about increasing diversity in teaching in relation to Anatomical Models, we are delighted to be able confirm that any SOMSO® Model which has “skin” can be supplied in white or black skin tones
- Images on the Adam, Rouilly website and in the SOMSO® catalogue currently do not reflect this availability but we would be delighted to discuss your requirements

Availability

- As currently
- Please contact Karen Holyer for further information karen.holyer@adam-rouilly.co.uk
