

Royal College of Paediatrics and Child Health Stroke in Childhood

Draft guideline consultation

(Comments due 5pm, Friday 20 January 2017)

Stakeholder, specialty group, special interest group or CSAC Please specify if you are responding on behalf of a group/committee	BACCH
Name of commentator	Dr J Paul Wright
Position	Consultant Developmental Paediatrician/BACCH Exec

Please note:

- Please fill in both the 'stakeholder organisation' and 'name of commentator' fields.
- Due to software difficulties, please note that references from chapters 7 and 9 are work-in-progress and will be completed during the stakeholder consultation.
- With regard to section 11.1, guideline audit, we ask you to review this carefully and if you have any suggestions to please add these to the comments table below.

Document (e.g. guideline or appendices)	Page number	Section number	Line number	Comments
Indicate document, section, page or line number -or- "general" if your comment relates to the whole document				Please insert each comment in a new row. Please do not paste other tables into this table, because your comments could get lost - type directly into table.
EXAMPLE: Guideline	33	3.2.1	514	We are concerned that.....
Guideline	51	5.3.2	14 on page	Centre should be centred
Guideline	46	5.1	6 on page	Should there be a , after Stroke Mimics
Guideline	68	6.6.3.1	23 on page	Score for PedNIHSS said to be \geq f. It should be a number (4)
Guideline	77	6.9	28-30 on page	Repetition
Guideline	123	9.4.4.2	15	Should be a , after communication skills otherwise hard to understand what is being said
Guideline	123-4	9.4.4.3	37 and 1	Neuropsychologist support is extremely limited. In our area access is only through Tertiary Centre
Guideline	131	9.4.8.3,	2 and 9	SENCo now known as SENDCo
