

This year the BAPM networks meeting is open to BAPM members and the wider neonatal community as well as representatives from each of the UK's 13 neonatal networks. Always well attended, this one-day meeting attracts senior neonatal staff to share best practice and discuss topical national issues.

This informal one-day virtual meeting will also be recorded and remain available on the BAPM website for members to watch at any time.

Programme

- The PERIPrem project – learning and outcomes
- The Physicians Associate Role in Neonatology
- Improving Drug Safety: Drug Standardisation, aseptic services and development of Network Pharmacy Roles
- QI: Network Standardisation of Intubation Drugs
- Network Implications of BAPM 2019 Framework for Perinatal Management of Extreme Preterm Birth
- Data Collection for 22-week infants
- Datasets, data collection and use of data
