

Evidence and Excellence in Perinatal Care

11-13 September 2019, Newcastle

Why is modern media a hot topic for neonatal professionals?

“The rate of knowledge generation continues to outpace the capacity for individual neonatal providers to stay “up to date” with the latest research evidence. Various modern media and communication technology tools offer an opportunity to lessen the growing evidence-practice gap in neonatology.”

Evidence and Excellence in Perinatal Care

What do you see as being the greatest challenge for neonatal professionals over the next ten years? (And how can we best prepare for this?)

“Adapting to and learning to leverage opportunities for improved care, research and education afforded by technological advances while simultaneously ensuring that they do not interfere with the various interpersonal relationships necessary for the provision of good care and fulfilling professional careers.”

How do you make the most of your time when attending conferences?

“By searching for the right balance between learning, socializing and recovering. I’m still looking!”

Nicolas Bamat

Nic is a clinical researcher and neonatologist at the University of Pennsylvania and The Children's Hospital of Philadelphia, where he is part of the Chronic Lung Disease Program, a multidisciplinary group focused on the care of infants with BPD.

His research focuses on continuous distending airway pressure levels in neonatal respiratory failure and pharmacotherapeutic practices in severe BPD. As the Social Media Lead for EBNeo, he has been instrumental in the society's growth as a leading disseminator of new neonatal clinical research knowledge.
