

What can BAPM do for me?

Nurses and ANNPs

Why should nurses and ANNPs join BAPM?

BAPM brings together neonatal and obstetric doctors, nurses, ANNPs, midwives, managers and allied health professionals in a single independent organisation. We do this because we know that perinatal care is best delivered by multidisciplinary professionals working as a team.

BAPM members can change the way care is delivered in the future. It is a great way to show your commitment to perinatal care and your own career development.

"I've given input into guidance documents that change how neonatal care is delivered. It feels intimidating to apply but everyone is so supportive and you get so much out of it I'd definitely say it's worth pushing yourself out of your comfort zone."

Jo Hodson, Consultant Neonatal Nurse and Neonatal Service Lead, Royal United Hospital

What benefits will I get?

- Keep up to date with sector news and best practice recommendations through our regular e-bulletins and complimentary subscription to Infant journal.
- The opportunity to shape perinatal practice by joining a working group.
- Grow your network online and offline with our special interest groups, conferences, workshops and meetings.
- Develop your skills and knowledge with our member only CPD resources
- Get recognition for yourself or your colleagues by entering for a BAPM award.
- Support from the BAPM Nursing and ANNP representative with any questions or issues you have.

"The BAPM resources that I have found most useful are the QI storyboards. They have helped inform and structure QI projects we are planning within our neonatal unit."

Alice Kavati, ANNP, University Hospitals of Leicester

How to join

Membership of BAPM for nurses and ANNPs is £50 for the year. Visit www.bapm.org/join to join today.

"I love being able to tap into a network of people for advice and to share developments. To anyone thinking of joining BAPM I'd say just do it! It's useful to anyone in Neonatal care, and you won't regret it."

Andrea Mayes, ANNP, St Michaels Hospital, Bristol
