

Gunter Schlegel MD Private medical doctor Germany

Gunter is a physician and lymphologist who completed his medical studies in 1987 at the University of Berlin.

Since 2000 Gunter has run a natural therapy orientated practice in Freiburg, Germany. The practice is mainly focussed on immunology, oncology, lymphology and microbiome based therapies.

Gunter has been using the micro-immunotherapy since 2000 and has been teaching the method 14 years. He regularly lectures for the German/Austrian Medizinische Gesellschaft fuer Mikroimmuntherapie (Medical society for micro-immunotherapy) and also acts as their hotline medical advisor.

Teaching philosophy

Gunter believes in an interactive education based on a vigorous dialogue between you and the trainer so please use the remaining time before the workshop to prepare some clinical cases. Talking about clinical cases is "learning by doing", bring in your own cases so we can discuss the practical aspects of micro-immunotherapeutic approaches.

Experience

- Teaching doctors, pharmacists, Heilpraktiker and physiotherapists since 1989. Lectures extensively
- on medical conferences, workshops and seminars.
