Online Summer School with Dr. Annette Sneevliet Evolution: Connecting All Methods of Homeopathic Practice

7 - 9 July 2022 (Thu - Sat) | 10am - 4.30pm

The Evolution Model taught by world-renowned teacher and author Dr. Annette Sneevliet will undoubtedly broaden your case-taking skills. Whether you have taken part in previous Summer Schools or are exploring this method for the first time, this content-rich 3-day Masterclass, packed with new case studies, is not to be missed!

Annette's skill is to be both one of the best prescribers and one of the best teachers in Homeopathy today. She trained with Sankaran in the Sensation Method, gaining an understanding of the vital sensation which forms an integral part of her case taking and case analysis skill. The 'gaps' in the Sensation Method, especially in the plant kingdom where many families are not described by Sankaran, are perfectly filled according to the Evolution Model.

She is very interactive in her approach and will move seamlessly through the three kingdoms identifying the evolutionary point at which the patient has got stuck and highlighting the key words and hand gestures to differentiate the kingdoms, families and sensations. By guiding and focusing us in on Mahesh's animal chart, she will show us how our prescribing can become even more precise, and her practical approach means you will be able to transfer your learning to your practice seamlessly.

The National Centre for Integrative Medicine (NCIM) NCIM supports a growing movement for change in healthcare, combining conventional, lifestyle and holistic approaches to improve health and wellbeing. NCIM is a Community Interest Company (08529099)

Early Bird (general): £180 / £60 per day
Full Cost: £210 / £70 per day
Early Bird (Members): £150 / £50 per day
NCIM Members: £180 / £60 per day

What is the Evolution Model?

We have already been using the concept of evolution for some time thanks to Jan Scholten's homeopathic mapping of the periodic table. We all go through the developmental process represented by the increasing 'maturity' moving through the seven rows of the periodic table, and the skill of case taking is to recognise at what stage the patient has become stuck. At what 'inner age' are they stuck - 'Baby' stage in Row 2, at 'Adult' stage in Row 4 or at 'King' stage in Row 6?

Michal Yakir has produced a hugely innovative table of the plant remedies, using the Cronquist system of plant classification. Here she maps the evolutionary development of the plant kingdom in periodic table form - from the inner age of 'Unborn baby' (with an undeveloped ego, unprotected with no borders) stage of Column 1 to the inner age of an adult with a strong masculine-dominant ego in the 'King' stage of column 6. Annette has been using the Table of Plants with great success for many years, and her unique expertise is bringing together Sankaran's plant family sensations with Yakir's method. These two systems fit perfectly together, and enhance each other in terms of understanding individual plant family themes and successfully prescribing plant remedies.

If that wasn't enough, Annette has also been working closely with Indian psychiatrist Mahesh Gandhi for many years as he has been developing his Evolutionary Table of the animal remedies.

Again, he plots the animal families according to evolution, initially differentiating the themes of the vertebrates from invertebrates, and then working from the 'immature' sea creatures needing their safe womb-like environment on the left of the table to the birds needing the freedom of the sky on the right side. Do not miss out on this opportunity to study with Annette in the UK. She mostly teaches in Holland, Germany and India and is attracting a growing numbers of people to her very dynamic teaching.

ONLINE SUMMER SCHOOL WITH DR. ANNETTE SNEEVLIET

7 - 9 JULY 2022 | 10am - 4.30pm

www.ncim.org.uk/training/summerschool

Dr. Annette Sneevliet graduated as a medical doctor from University Nijmegen in 1986. She studied homeopathy with many great teachers, including Geukens, Vithoukas, Zaren, Mangialavori, Scholten, and Sankaran. She has an established homeopathic practice and also teaches at the School of Homeopathy in the Netherlands. For her, the evolution model is an ideal way to understand the patient, to understand their life, their evolution and development, mapping them into the Materia Medica and finding a profound remedy for them. Together with the sensation method and the classical homeopathic tools - repertory and materia medica - she achieves a high degree of certainty in her prescriptions.

Event Details

Venue: Online via Zoom

Date: 7 - 9 July 2022 (Thursday - Saturday)

Time: 10am - 11.15am / 11.45am - 1.00pm / 2.30pm - 4.00pm (x3 sessions per day)

Early Bird - Until 31 May 2022

Standard Tickets: £180, £60 per day | **NCIM Members:** £150, £50 per day

Full Cost

Standard Tickets: £210, £70 per day | **NCIM Members:** £180, £60 per day

NB the event is held over three days and you can buy a ticket for individual days if you can't attend all three. The event will also be recorded and individual days will be available to buy. All live attendees will automatically have access to recordings of the sessions they attended.

Payment options: Payments can be made on our website, via BACS, or by card over the phone. Contact us at education@ncim.org.uk | 0117 973 8035

NCIM Membership

If you would like to join our membership and join a growing community of like-minded healthcare professionals who are passionate about the transformation of healthcare to a model of wellness that includes the best of conventional, lifestyle, and holistic approaches, do check out our website. Members receive discounts to a range of events, free access to our Holistic Doctor Webinars, and access to exclusive content www.ncim.org.uk/ncim-integrative-health-and-scientific-network

We look forward to meeting you at the Summer School (virtually)!
