

## INTERNATIONAL WEB CONFERENCE WITH WORKSHOP

### Studies on the 17th-century defensive architecture in Ukraine: the problem-solving process

**When?** June 28, 2022, 10:00 - 12:00 CET

**Where?** Zoom (credentials provided upon registration – see underneath)

This workshop is part of the project dissemination: “Jacques Perret Influence on Defensive Polish Architecture in the 17th Century”, where Pidhirtsi bastion castle is the main case study. The method explained in the workshop is the primary method used to analyze defensive architecture in the project.

In cooperation with EFFORTS - Forte Cultura, the European Federation of Fortified Sites, we organize this workshop and invite all interested parties to participate.

#### **Content:**

Once the defensive structures and valuable assets of cultural heritage, bastion castles again stand in front of the possibility of being attacked. On the territory of Ukraine, defensive architecture is put in danger of destruction by war again. At the same time, many of them are reviving their primary function of hosting and protecting people inside their defensive walls.

**The workshop idea** is to look at the military building from an architectural perspective to see the advantages of such a complex structure. The method of analysis used in the workshop is based on the building's composition, spatial relations, and location in the landscape, which will help to understand better a bastion castle and its future perspectives. It is also a way to see influences from European treatises, in a particular case, the impact of French architect Perret on Ukrainian military architecture, to find the connection with other European bastion castles and create a common cultural route that will help in the successful development of the regions to which those structures belong. The supportive program for such an idea has already been launched in April 2022. It is called the Twinning - Cooperation Programme, which was created under the initiative of EFFORTS Europe - Forte Cultura and will be presented during the conference session.

**The method** shown during the workshop was previously tested on-site in bastion castle analysis of Pidhirtsi with the students of Lviv Polytechnic University in Ukraine. The presentation of results obtained from the real case analysis will bring new insights into understanding the method's benefits. The invited speaker, Dr. Oresta Remeshylo-Rybchynska, will show the current problems of the architectural ensemble of Pidhirtsi. The post-workshop reflection will be given by the young architect, Yurii Tsybukh, who is starting his path to discovering how to approach the complex buildings.

## PROGRAMME

10:00	<b>Opening Speech</b>	
10:05	EFFORTS-Forte Cultura - Ukraine Twinning and Cooperation Programme	<b>Rafaël Deroo</b> Secretary general EFFORTS Europe
10:35	Problems of revaluation of the architectural ensemble of the Pidhirtsi residence of the 17th-18th centuries. The current state of the Palazzo in Fortezza building	<b>Oresta Remeshylo-Rybychynska</b> Ph.D., Docent at Lviv Polytechnic National University, Architectural Department
10:50	<b>Coffee Break</b>	
11:00	Workshop: Exploration and application of 3-step approach specifically designed for studies on bastion castles by the instructor	<b>Olha Tikhonova</b> Ph.D., Assistant Prof. at Tadeusz Manteuffel Institute of History of the Polish Academy of Sciences
11:30	Post-workshop Reflection. Educational meaning and future development proposal of Pidhirtsi palace	<b>Yurii Tsybukh</b> Student at Lviv Polytechnic National University
11:45	<b>Q&amp;A. Discussion. Closing</b>	

---

**Organizer:** Olha Tikhonova, Ph.D. (Assistant Prof. at Tadeusz Manteuffel Institute of History of the Polish Academy of Sciences)

For **registration** and any further details, please get in touch with Olha Tikhonova by email:
