CITATION

Really impressive site specific concepts, very well developed using appropriate forms, colours, materials and planting. Wit is always welcome when well done, as in the paper airplanes reference. Excellent presentation board - images, descriptive text and layout. Great to see roundabouts made memorable landmarks, they're such a ubiquitous part of people's daily lives. More council clients please copy!

CITATION

An exceptional £20 million investment in a carefully designed, well executed blend of restoration, reinterpretation and new interventions for this historic setting. The project's scale, the involvement of so many local craftsmen, and the maximum use of local materials impressed the jury. Having the local Horticultural College propagate plants was seen as a very good decision, as were training opportunities during construction. It's admirable that the walled garden is managed organically, grows many heritage varieties and provides produce for the on-site cafe, while both create employment.
