

This private garden, completed in November 2019, was created as part of the remodelling of the house by Aughey O'Flaherty Architects. The brief was to create a garden to wrap around the dwelling and link it to the garage/carport and garden room with pergola. The clients also had a collection of art to be incorporated in the garden.

The planting scheme provides evergreen screening from neighbouring properties and colour and interest throughout the year. It is intended to be an informal compliment to the strong lines of the hard landscaping design by the architects.

LEGEND:

- 1. Existing Fagus retained
- 2. Small formal lawn with Quercus suber specimen
- 3. Drought tolerant planting around existing Betula
- 4. Taxus hedge
- 5. Mixed planting border - specimen trees and herbaceous
- 6. Espalier Quercus ilex and herbaceous
- 7. Prunus lusitanica hedging, Quercus ilex standards and mixed border
- 8. Existing lawn reinstated after sculpture installation
